

TEST KITS

Sample collection kits for testing are available from the Association office. Simply let the office know how many you need and we will send them out. Total cost is \$10.00 per kit plus \$5.00 approximate for shipping, and a \$20.00 Weights and Measures fee (billed separately).

You do not have to be a certified hazmat shipper to send diesel fuel by land shipment.

When you take the samples, ship them back to the Association office and we will deliver them to Weights and Measures. They will send the test results directly to you and bill the Association. We in turn will bill you.
